Proposal Details:

Student research:

You are a student in the University of Health Sciences, Phnom Penh, for obtaining a Master degree.

Your supervisor is “Dr. Eric Renard”.

eric.renard@uhsphnompenh.kh

+855 1 234567

This supervisor is also from the University of Health Sciences in Phnom Penh.

Dates of research:

The research will start: April 20th 2013

And end: October 15th 2014

Sponsors:

Your primary sponsor is the World Bank.

But you also have a secondary sponsor: the Institute for Child Health

Geographical area of the research

This research will also be conducted in Lao PDR and Vietnam.

It's a nationwide research. However, three sites have been randomly chosen for conducting it in Cambodia: The Takeo province, the Battambang province and the Kratie province.

Research Field:

Child Health

Human subject:

Yes: Population based survey

Data Collection:

Both

Review by other ERC

Yes, the final decision is available

Source of Monetary and Material Support:

You have one source of support: 10 000 US\$ from the World Bank
But you bring 5 000 US\$ from your own bank account.

Risk Assessment:

Nothing special except that the research subjects are under 18 years old.

The level of risk is no more than minimal risk. The risks would be on the research subjects.

The benefits of this research would be generalizable knowledge about participants' condition or disorder.

This is a single institution project and you don't have any conflict of interest.
